

SECTION VIII

Rules for Construction of Pressure Vessels

2023

ASME Boiler and
Pressure Vessel Code
An International Code

Division 1

Markings such as “ASME,” “ASME Standard,” or any other marking including “ASME,” ASME logos, or the ASME Single Certification Mark shall not be used on any item that is not constructed in accordance with all of the applicable requirements of the Code or Standard. Use of the ASME Single Certification Mark requires formal ASME certification; if no certification program is available, such ASME markings may not be used. (For Certification and Accreditation Programs, see <https://www.asme.org/certification-accreditation>.)

Items produced by parties not formally possessing an ASME Certificate may not be described, either explicitly or implicitly, as ASME certified or approved in any code forms or other document.

AN INTERNATIONAL CODE

2023 ASME Boiler & Pressure Vessel Code

2023 Edition

July 1, 2023

VIII RULES FOR CONSTRUCTION OF PRESSURE VESSELS

Division 1

ASME Boiler and Pressure Vessel Committee
on Pressure Vessels

The American Society of
Mechanical Engineers

Two Park Avenue • New York, NY • 10016 USA

Date of Issuance: July 1, 2023

This international code or standard was developed under procedures accredited as meeting the criteria for American National Standards and it is an American National Standard. The standards committee that approved the code or standard was balanced to ensure that individuals from competent and concerned interests had an opportunity to participate. The proposed code or standard was made available for public review and comment, which provided an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “certify,” “rate,” or “endorse” any item, construction, proprietary device, or activity. ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor does ASME assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representatives or persons affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

The endnotes and preamble in this document (if any) are part of this American National Standard.

ASME Collective Membership Mark

ASME Single Certification Mark

“ASME” and the above ASME symbols are registered trademarks of The American Society of Mechanical Engineers.

No part of this document may be reproduced in any form, in an electronic retrieval system or otherwise, without the prior written permission of the publisher.

Library of Congress Catalog Card Number: 56-3934

Adopted by the Council of The American Society of Mechanical Engineers, 1914; latest edition 2023.

Guide for the Design and Operation of Quick-Actuating and Quick-Opening Closures	589
Introduction	589
Responsibilities	589
Design	589
Installation	590
Maintenance	590
Inspection	590
Training	590
Administrative Controls	591
Guidance for the Use of U.S. Customary and SI Units in the ASME Boiler and Pressure Vessel Code	592
Use of Units in Equations	592
Guidelines Used to Develop SI Equivalents	592
Soft Conversion Factors	594

Nonmandatory Appendix HH	Tube Expanding Procedures and Qualification	595
HH-1	General	595
HH-2	Scope	595
HH-3	Terms and Definitions	595
HH-4	Tube Expanding Procedure Specification (TEPS)	596
HH-5	Tube Expanding Procedure Qualification	596
HH-6	Tube Expanding Performance Qualification (TEPQ)	596
HH-7	Tube Expanding Variables	596
Nonmandatory Appendix JJ	Flowcharts Illustrating Toughness Testing Requirements and Exemptions From Toughness Testing by the Rules of UHA-51	603
JJ-1	UHA-51 Toughness Test Requirements for High Alloy Vessels ...	603
Nonmandatory Appendix KK	Guide for Preparing User's Design Requirements	609
KK-1	Introduction	609
Nonmandatory Appendix LL	Graphical Representations of $F_{t,min}$ and $F_{t,max}$	615
LL-1	Scope	615
LL-2	Conditions of Applicability	615
Nonmandatory Appendix MM	Alternative Marking and Stamping of Graphite Pressure Vessels	624
MM-1	General Requirements	624
MM-2	Application of the Certification Mark	624
MM-3	Application of Characters Directly to Graphite	624
MM-4	Acceptance Criterion	624
Nonmandatory Appendix NN	Guidance to the Responsibilities of the User and Designated Agent	625
NN-1	Introduction	625
NN-2	Information Regarding the "User" Designation	625
NN-3	Information Regarding the User's "Designated Agent"	625
NN-4	Common Scenarios Involving the "User" or "Designated Agent" Responsibilities	626
NN-5	Examples Illustrating the NN-4 Common Scenarios Involving the "User or His Designated Agent"	626
NN-6	Specific Code-Assigned Responsibilities	627
Nonmandatory Appendix PP	Guide to the Relocation of Overpressure Protection Requirements	634
